

Rattlesnake Mountain Shooting Facility Highpower Range Annual Match Records

Introduction: Just as the title suggests this is a list of the Annual Match Records for each type of match. In other words, it is the highest winner's score from all the matches held of that type in any given shooting season.

This does not mean that other match winners did not shoot well, nor does it mean that non-winners did not shoot great scores.

Shooting is an outdoor sport and especially at Rattlesnake Range the winds for one match may be quite readable and make scoring easier than other times when the Snake is in full form, the winds are tricky, and high scores are unlikely.

In addition to these Annual Match Records, starting in 2017, Match Directors began to take note of other scores that are not annual match records. That table of "cleans", which appears in Appendix A, is not in any way an attempt to capture all great scores, and it does not quantify the weather conditions or difficulty of targets used.

NOTE: It has become common practice at RMSF for club level matches to use targets at ranges other than their original design distance for some match stages. This means that the subtended angle of the scoring rings is larger than is commonly used elsewhere. Scores tend to be higher than if standard targets were used. Unfortunately, this means that these scores cannot be compared on an apples to apples basis with scores from similar matches nation wide that use targets at their standard distances. When trying to understand these scores in proper context, be sure to note the targets that were actually used at the match distances.

Rattlesnake Mountain Shooting Facility

Highpower Range Annual Match Records

Possible score is 400 – 40x.

Target used at 100 yd is the NRA A-25. The aiming black is 8" diameter. Ring diameters on the A-25 target are X-1", 10-2", 9-4", 8-6", 7-8", 6-10", 5-12".

Target used at 200 yd is the NRA A-21. The aiming black is 12" diameter. Ring diameters on the A-21 target are X-2", 10-4", 9-8", 8-12", 7-16", 6-20".

*Starting sometime in the 2016 season the SR-42 target was made an optional target to the A-21 target. Since several SR-42 targets were on hand, they have been used intermittently throughout the year. The scoring rings for the SR-42 target are larger (easier) by 0.56 inches, except for the X-ring which is 0.1" smaller. Further the SR-42 target has a 5 ring, where there is no 5 ring on the A-21 target. The SR-42 target is a centerfire 300 yard target which has been proportionally size reduced for use at 200 yards. The A-21 target is the NRA Smallbore target designated for use at 200 yards.

Scoring Ring Diameter	NRA A-21 Smallbore Target	NRA SR-42 Centerfire Target
Aiming Black	12"	12.56"
X	2"	1.90"
10	4"	4.56"
9	8"	8.56"
8	12"	12.56"
7	16"	16.56"
6	20"	20.56"
5	none	24.56"

Because of this change, the 2016 season record, and subsequent records set using the SR-42 target at 200 yards cannot be compared on an apples to apples basis with previous year records.

Rattlesnake Mountain Shooting Facility Highpower Range Annual Match Records

Appendix A Notable Cleans

To understand the targets used for any given match, notes have been placed at the bottom of each match table. Several club level matches use standard targets at ranges which are not standard for that target in part of the match. As a result at one of the ranges, the subtended angles for the various scoring rings is larger than intended by sanctioning bodies. All of the “cleans” shown in both the first table, as well as match records fall into that category. That does not mean the “clean” is not a great score, it just means it is not comparable to scores shot in standard matches following the rules of sanctioning bodies.

The following table is simply is a list of “clean” scores shot over the course of any given day, as reported by the Match Director, and for which recognition was requested by the Match Director.

A “clean” simply means that all shots were 10’s or X’s, but does not mean all shots were X’s. In the highly unlikely event that someone shoots all X’s in a match over any given day, that is defined as a “super clean”, and will listed separately.

The reasons a “clean” for a day may not be an annual match record are twofold. First it may have been shot on a single day of a multi-day match, or for a single day club level match, the score may have been beaten out for the annual match record by another “clean” with a higher X count. Please note there are several “cleans” which are annual match records and so appear in the appropriate annual record table, they are not duplicated in the table of “cleans” to avoid redundancy.

This new table of “cleans” is not retroactive, and probably is not complete, this is in no way intended to be a slight to any shooter. If you or anyone you know shot a daily “clean” in a match that did not qualify as an annual match record, please let George Crawford at gcraft3127@aol.com know the details and the score will be added to that table of “cleans”.

October 7, 2019	George Hager	373 – 12X

All firing is from 100 yd. Possible score is 400 – 40x.

Ring diameters on the original rimfire target are as follows:

X - 3.25", 10 - 5", 9 - 8.5", 8 - 12", 7 - 15.5", 6 - 19", 5 - 22.5", 4 - 26".

The aiming black is 5" diameter.

*This was the first time Ken had tried a Rimfire match.

**Pete was the first to shoot 100-10x on any stage. His perfect score was in the prone rapid fire.

August 17, 2008 the original rimfire target was replaced with the NRA SR-42. Ring diameters on the SR-42 target are as follows:

X - 1.9", 10 - 4.6", 9 - 8.6", 8 - 12.6", 7 - 16.6", 6 - 20.6", 5 - 24.6"

The aiming black is 12.6" diameter.

***Russ Hammond was shooting a rifle in .17 HMR.

US Marine Corps Birthday/Memorial Match

Record Date	Record Holder	Total Score
November 15, 2009	Todd Taylor	50 hits – 404 pts
November 12, 2010	Miles Michel	51 hits – 422 pts
June 25, 2011	Carl Witteman	38 hits – 410 pts
2012-2014	None Scheduled	
June 12, 2015	Dave Sotelo	31 hits – 288 pts

Match consists of 1 minute rapid fire shooting from 600 yd (prone), 300 yd (sitting), 200 yd (standing). 60 rounds maximum.

Hits at 600 yd are worth 6 pts each. Hits at 300 yd are worth 3 pts each. Hits at 200 yd are worth 2 pts each. Points double at any distance if the number of hits is 10 or more.

Target used at all three distances is the US Marine Corps "D" prone silhouette.

For 2011 the match was modified.

Match was all prone rapid fire, consisting of 1 minute rapid fire shooting from 200 yd, 300 yd, and 600 yds. Followed by a 2 minute rapid fire prone at 800 yards. 50 rounds maximum.

Hits at 800 yds are worth 8 points each. Hits at 600 yd are worth 6 pts each. Hits at 300 yd are worth 3 pts each. Hits at 200 yd are worth 2 pts each. Points double at any distance if the number of hits is 10 or more.

Target used at all four distances is the US Marine Corps "D" prone silhouette.

Record Date	Record Holder	Total Score
April 21, 2006	Felix Solis	186 – 14v
November 3, 2006	Paul Rittmann	368 – 7x
August 24, 2007	Phil Brackenbury	342 – 5x
November 22, 2008	John Julian	366 – 7x
June 19, 2009	Russ Hammond	372 – 9x
August 20, 2010	Russ Hammond	358 – 3x
October 1, 2011	George Hager	269 – 1x
October 6, 2012	George Hager	307 – 3x
March 2, 2013	John Julian	351 – 10x
<p>All firing is from 300 yd. Possible score is 400 - 40x. Ring diameters on the 300 yd NRA target are as follows: X - 3", 10 - 7", 9 - 13", 8 - 19", 7 - 25", 6 - 31", 5 - 37". The aiming black is 19" diameter. The first OAR was fired on April 21, 2006 using the 200 yd 5V target. Felix Solis' score was the highest ever recorded on a 5V at that time. Since then the OAR target has been the NRA 300 yd target (SR-3).</p>
